

MAY BOYCOTT MINOR LEAGUES

Which Are Holding Out
Against Major League
Draft

BAN JOHNSON
TO OFFER PLAN

At December Meeting of
the Junior Cir-
cuit

New York, Nov. 15.—A proposal that the American League boycott the minor leagues which have held out against the draft will be made by Ban Johnson at the December meeting of the junior circuit in New York, according to reports here to-day. This, it was said, was the bomb which Mr. Johnson said recently he intended to toss into the meeting.

The draft question has been agitating baseball for the past two years. Commissioner Landis was indicted into office, five of the minor league obtained exemption from the draft agreement. Last year a proposal that the five minor leagues be boycotted failed at a meeting of the National league clubs. Now it is proposed, according to reports, that the boycott be extended to the American league.

The five minors which are not bound by the draft agreement are: American association; International league; Pacific Coast league; Southern association and Western league.

80 BASKETBALL CANDIDATES.

Out for the University of Vermont
Varsity Quintet.

Burlington, Nov. 15.—The first basketball practice of the year at the University of Vermont was held Tuesday evening with over 80 candidates reporting to Coach Tom Keady, who will take charge of the squad for the time being at least. This year's squad is the largest in Vermont's basketball history. It will be increased later when several of the football players report at the end of the grid season.

With the exception of Harris, Coach Keady has his last year's team as a nucleus for this year's quintet, together with several new men who come to Vermont with enviable records of the court. Semanski, considered one of the best college guards in the east, did not report as he is still with the football team. Isham, center, Cavward, forward, Captain Stevens, forward, and Burns, guard, complete the personnel of last season's team.

Katz, guard, Yarnell, forward, Beck, center and guard, and Eastburn, forward, comprise some of the new material whose basketball ability is recognized.

The schedule which is not yet completed includes games with some of the leading teams in the east, the outstanding contests being with Holy Cross and Dartmouth. Vermont last season defeated Holy Cross, eastern champions. Dartmouth is a new comer on the Green and Gold schedule.

MIDDLEBURY DRILLING HARD.

Polishing Off Some Defects Shown
in Columbia Game.

Middlebury, Nov. 15.—The Middlebury eleven put in a hard drill yesterday getting rid of the defects shown in the Columbia game Saturday. Coach Morey speeded up practice.

THE MORNING NEWS SUMMARY

German cabinet of Chancellor Wirth resigns after united socialists voted not to participate in coalition ministry which included members of German people's party.

Prime Minister Bonar Law professes confidence in return of his party with working majority in British elections to-day.

Germany must get eight hundred billion marks' worth of grain to feed her people next year, inquiry by reparations commission reveals.

French priests, many of them soldiers, seek prosecution of former Premier Poincaré for reported remarks calling them slackers.

Turkish nationalist governor of Constantinople concedes in principle right of allied forces of occupation to exercise police control over their own nationals.

Lady Astor gets mighty reception in her final appeal to voters and she says: "I know I have won a magnificent victory."

Chilean chamber of deputies adopt Tacna-Arica protocol with Peru without reservations.

Irish women send message to Vatican that prison chaplain has denied the sacrament to Mary MacSwiney, who is on hunger strike.

German note to reparations commission declares that ultimate stabilization of mark can only be achieved after reparations problem has been finally settled.

Mrs. Murial MacSwiney, under arrest in Washington for picketing the British embassy, chooses to remain in house of detention over night, refusing to accept offer of bond.

Ambassador Child at Rome and Minister Grew at Bern are to be American observers at Lausanne near eastern conference.

White House developments indicate possible addition of railroad legislation to ship subsidy and other administration measures on program for coming Congress.

Charles M. Schwab at Cleveland urges bankers to look with greater favor on industrial securities for prospective loans.

Clemenceau's itinerary, subject to changes, includes speeches in New York, Boston, Chicago, St. Louis, Washington and Philadelphia and visits to Springfield, Ill., Baltimore and Annapolis.

Arthur Crawford, humorist, despondent over his own ill health and that of his wife, kills himself at lonely spot in the Bronx, N. Y.

America trained only 22,000 men in citizens training camps last summer against Canada's 100,000. Secretary of War Weeks declares before chamber of commerce at Boston.

President Harding requested by Mayor Curley of Boston to settle problem of New England freight differentials.

Fred Chapman of Boston gets decision over Mickey Travers of New Haven in ten-round bout at Boston.

Lieutenant Governor Fuller, acting governor of Massachusetts, decides to personally investigate the case of Dorothy Gordon, a patient in a sanitarium at Waverly.

Flat Fish Have Traveling Eyes.

Eyes are made to fit their jobs. Crabs and lobsters, which are slow-movers, have eyes on the tips of short stalks, so that they can see almost all round them, and thus sight their enemies in plenty of time to escape.

The eyes of snails and slugs are perched on the ends of their feelers, so that they can look in every direction without moving.

Rabbits and hares live continually on the alert, nature has given them eyes at the side of the head, enabling them to keep watch without the trouble of turning around. Birds, of course, have the same power; they have only to move their necks to see all around them.

Insects have compound eyes—that is, each eye is made up of many eyes, or facets. The eye of the common housefly, for instance, has 17,000; while there are some beetles having eyes with as many as 25,000 facets. The ant—with all its intelligence—has but 60 facets in each eye.

These compound eyes do not move in their sockets, for the facets give them the power of seeing in all directions at once.

Birds' eyes have an inner lid which acts as a sort of blind or shutter to protect them from the glare of strong sunlight. And the fawn family in addition, has feathers that arch over the eyes and form a sunshade.

Flat-fish, such as soles, plaice, and turbot, have traveling eyes. These fish, when young, are exactly the same shape as all the other small fry, with an eye on each side of the head. But as they grow, the bones of the head and face twist round, bringing both eyes to the same side of the head.

Unless eyes are exercised, they soon become useless, just as the muscles do. The Mammoth Cave of Kentucky, in the United States, contains many blind fish and other creatures which have lost their sight through living in constant darkness.—Tit Bits.

Madam Reed of East Brookfield became great-great-grandmother last Saturday, when a son was born to Mr. and Mrs. Roscoe Perkins of Bethel. This is a distinction which falls to very few.

WATCHMAN WAS SAVER OF LIFE

Milo Blood Aroused Sleepers
In a Lynn
Building

ELEVEN RESCUED
IN FOLSOM BLOCK

Loss on Building and Contents
Estimated
at \$12,000

Lynn, Mass., Nov. 15.—Eleven persons were rescued by firemen and police early to-day in a fire in the Folsom block at Union and Buffum streets. The loss was estimated at \$12,000.

The flames were discovered by Milo Blood, night watchman, who aroused most of those in the building. His work probably saved loss of life, the police said.

EAST BROOKFIELD

Mr. and Mrs. Cassidy and three children of Northfield spent Sunday with Mr. and Mrs. A. G. Bigelow.

Mr. and Mrs. Alex Milne of Barre, Mr. and Mrs. M. W. Stoddard of East Hill and Elton Ellis of Burlington were Sunday visitors at P. G. Reed's.

Fred Brown hurt one knee quite badly last Wednesday while rolling logs at Preston's mill.

Mr. and Mrs. Walter Perkins of Bethel visited last week at her mother's, Mrs. W. F. Medcalf.

The new cement bridge just above Clark's is now open to traffic.

C. W. Smith was a business visitor in Williamstown last Monday.

Miss Mary Shufelt is now visiting at Mrs. F. E. Holmes.

A reception was held last Saturday evening at the home of Mr. and Mrs. E. G. Harrington for Mr. and Mrs. Clyde Brown. Nearly 100 guests offered congratulations and best wishes to the young couple and also showed substantial proof of their good will by leaving gifts in linen, pyrex, silver and money. Cake and coffee and a beautifully decorated wedding cake were served, after a short musical program.

RANDOLPH

Dr. Flora Jones of Montpelier was the guest of her mother, Mrs. E. C. Heath, on Sunday.

Mr. and Mrs. E. E. Brooks left Tuesday morning for St. Petersburg, Fla., to spend the winter. The trip from New York to Jacksonville will be made by boat.

The University club held its meeting Monday evening with H. L. Hatch. The wives of the members were entertained the same evening by Mrs. J. P. Gifford.

Mr. and Mrs. Donald Salisbury, Mrs. J. Carleton Jones and little son and Mrs. Harry Jones and children went Monday to Burlington on a business trip.

The Rochester and Bethel bridge players were entertained by the Randolph ladies Tuesday at Odd Fellows' hall.

Miss Helen Howe, formerly a teacher in the graded school here, but now of Bar Harbor, Me., was an over-Sunday guest at E. S. Tracy's. She was accompanied by her aunt, Miss Anne Howe, and her brother, Carl Howe, both of Tunbridge.

Dartmouth Student Managers Must be
Scholars.

Hanover, N. H., Nov. 15.—The Dartmouth college athletic council has voted that beginning with the class of 1923, sophomores desiring to enter the annual competitions for positions as managers of athletic teams must have received during the preceding year a scholastic average of 2.0 on the scale in which 4.0 is the highest mark.

This action was taken after the faculty of Dartmouth college had requested the athletic council and the council on student organizations to inquire into the cause of the decline in scholastic grades of men entered in management competitions.

As a result of the inquiry it was found that men entered in such competitions whose grades were not high during the preceding year usually allowed their grades to drop throughout the period of competition, while those candidates who had previously attained a mark of at least 2.0 were able to keep their grades at that level.

It was also found that the high ranking scholars usually rank more highly in the competition for management positions and that during the past four years all but one of the student managers of major sports at Dartmouth have been men of high scholastic rank.

NORTHFIELD

SALTS CANNOT HARM KIDNEYS

Eating too much meat may
clog Kidneys, then the
Back hurts.

Most folks forget that the kidneys, like the bowels, get sluggish and clogged and need a flushing occasionally, else we have backache and dull misery in the kidney region, severe headaches, rheumatic twinges, torpid liver, acid stomach, sleeplessness and all sort of bladder disorders.

You simply must keep your kidneys active and clean, and the moment you feel an ache or pain in the kidney region, get about four ounces of Jad Salts from any good drug store here, take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine.

This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and is harmless to flush clogged kidneys and stimulate them to normal activity. It also helps neutralize the acids in the urine so it no longer irritates, thus helping to relieve bladder disorders.

Jad Salts is harmless; inexpensive; makes a delightful effervescent lithia water drink which everybody should take now and then to help keep their kidneys clean.

A well-known local druggist says he sells lots of Jad Salts to folks who believe in trying to correct kidney trouble while it is only trouble.—adv.

BOSTON MARKET REPORTS.

Some Grades of Eggs Higher in Price,
Others Unchanged.

Boston, Nov. 15.—Jobbers have jacked up prices on eastern and the best grades of western eggs, but have not changed those on henney. Local quotations on butter and cheese remain as heretofore. Butter was unchanged at Chicago, but eggs took a big jump there, approximately 2@8c a dozen on everything but a storage which are up 1/4c. Eggs were up 1c at New York and down 2@5c at St. Louis.

Local jobbing quotations on butter, cheese and eggs follow:

Butter—Northern creamery, in tubs 50 1/2@51c a pound, in boxes 52 1/2@53 1/2c, in prints 52 1/2@53 1/2c; western creamery, in tubs, fancy 48 1/2@49 1/2c, good to choice 46 1/2@47 1/2c, fair to good 43 1/2@45 1/2c.

Cheese—New York twins, fancy, 27 @27 1/2, fair to good 25@26c. Young America 27 1/2@28c.

Eggs—Hennery 92@93c a dozen, eastern, choice 82@83c; western, extra 74@75; prime firsts 64@66c, firsts, 58@60c, storage extras 39@40c, extra firsts 36@38c, firsts 33@35c.

WHY FARMERS FAIL.

Some of the Reasons Set Forth by the
Vermont Farm Bureau.

"In view of the recent press comment in the state in regard to the unusual number of bankruptcies among farmers, the Vermont Farm Bureau federation issues some interesting figures as to the agricultural situation in this part of the country, as compiled by the bureau of agricultural economics, United States department of agriculture. These figures show that the general index of purchasing power of farm products in terms of other commodities stood for September, 1922, at 64 per cent of the purchasing power in 1913, as compared with 69 per cent in August and 72 per cent in June.

In other words, it is definitely shown that the farmer's dollar, based on the prices which he is receiving for his produce to-day, is worth only about 64 cents when he comes to purchase in the open market.

A glance at the general agricultural situation in the east shows that milk prices are advancing as usual this fall, but that feed prices are also higher. Potato growers are thoroughly pessimistic, selling at 25 cents to 40 cents a bushel at the car. Potatoes are rotting considerably. The apple market is sluggish. Poultry men, apparently, more optimistic than dairy or fruit farmers.

Figures recently compiled in regard to the profits of the dairy industry in this section of the country show that the labor income of the dairy farmer has been steadily decreasing since 1918, when it reached its peak and is less to-day than it was in 1913 before the war, even though he has to pay considerably more for things that he has to buy than he did in the period just before the war. The term "labor income" represents what the farmer has left for his year's work after deducting actual expenses and interest on his invested capital.

In commenting on the present agricultural situation in this country, Professor G. F. Warren of Cornell university, who was in Europe last year as a representative of the United States department of agriculture to study various phases of the economic situation, says in part:

"Formerly European buyers entered

Guard Against "Flu" With Musterole

Influenza, Grippe and Pneumonia usually start with a cold. The moment you get those warning aches, get busy with good old Musterole.

Musterole is a counter-irritant that relieves congestion (which is what a cold really is) and stimulates circulation. It has all the good qualities of the old-fashioned mustard plaster without the blister.

Just rub it on with your finger-tips. First you will feel a warm tingle as the healing ointment penetrates the pores, then a soothing, cooling sensation and quick relief.

Have Musterole handy for emergency use. It may prevent serious illness. 35c and 65c, in jars and tubes. Better than a mustard plaster.

strongly into our cash and speculative markets as soon as the crops were ready to move. Now they have great difficulties in financing themselves. They put off buying until the last minute. There is a strong tendency to use the European crops in the early part of the season and buy at the last end of the season just enough to finish out the year. If there is any carry-over from one year to the next, he lets someone else keep it.

"This change means that America must retain ownership of its farm products for a longer time than before the war. This is one way of financing Europe. The market is likely to be weak at harvest time. If, when European buying begins, there proves to be a shortage, it makes a strong market at the end of the year.

"Before the war, the buyer foreman. Supply and demand tended to balance and this tended to steady the market. Now, with the delayed buying, the demand is much less certain. It is difficult to foresee at what point supply and demand will find an equilibrium.

"The financial conditions of Europe continue to be the most disturbing factor in the market situation. Most of the countries of Europe are continuing to spend more than their income. The difference is made up in some cases by borrowing and in other cases by printing paper money. So long as this condition continues it will seriously interfere with the sale of American farm products."

Self-Determination.

A Dutch scientist has discovered the existence in the heavens of a body twenty thousand million times larger than the sun. We understand that it is to be allowed to remain there for the time being—Passing Show (London).

Apply thickly over throat—cover with no flannel—

VICKS VAPOR
